Category Name I&T

Actionee ECS

Sub Category

Subject Schedules of SCF and DAAC Toolkit Development, I&T

Description of Problem or Suggestion:

Concerned how about the release, test and update schedules for the SCF and DAAC toolkit versions interrelate. For example, is there sufficient time for the lessons learned from IR-1 beta SCF software I&T to influence the next planned release of each of the toolkits?

Originator's Recommendation

Provide schedules for SCF and DAAC toolkit development, including integration (delivery) and test activities for each version. Provide one schedule for the SCF toolkit and one for the DAAC toolkit in the same context and scale so they can be compared to each other and to the overall ECS development/release schedule.

GSFC Response by:

HAIS Response by: Jacob Eisenstein

HAIS Schedule 9/6/95

HAIS R. E. D. O'Neill

HAIS Response Date 9/15/95

With the release of the DAAC version of the SDP Toolkit in Ir1 the SDP Toolkit CI development is complete. Future releases are planned and scheduled on an as needed basis as part of the SDP Toolkit Sustaining Engineering. ECS has been requested by ESDIS to provide a proposal in September to layout plans for future toolkit releases. ESDIS will authorize any future SDP Toolkit releases based on this or subsequent proposals. When this approval is received, schedules will be provided for future releases of the DAAC and SCF versions of the SDP Toolkit.

When any upgrade in functionality or software fixes is approved for the SDP Toolkit, an analysis will be conducted to determine if one or both versions need to be modified and released. After the modifications have been made, whether to one or both versions, regression testing is conducted on both versions to ensure consistent results.
